SUMMARY

QA Engineer with professional experience in web application testing, accessibility compliance, and QA workflows. Skilled in usability testing, bug reporting, and release validation, with interest in AI-assisted development, workflows, and process automation.

PROFESSIONAL EXPERIENCE

Manual QA Engineer 03/2025 - Present

- Perform manual website testing focusing on functionality, usability, and WCAG compliance.
- Review and validate client requests, ensuring accurate implementation.
- Conduct final quality checks before deployment and maintain documentation.

PROJECTS

Accessibility CI Testing - Bachelor Thesis

- Developed an automated accessibility testing workflow for web applications using Playwright and axe-core integrated into a GitHub Actions CI pipeline.

InvoiceGenerator

- Developed a web platform for freelancers to generate and send invoices to clients using Next.js, Supabase, and Resend.

Volta

- Team project developing a web application for monitoring elements in an energy microgrid using Angular, C#, MongoDB, and SQLite.

Personal Task Diary

- Built an Android task & calendar app in React Native (Expo), Features daily task management, statistics with SVG charts, and local notification reminders.

EDUCATION

Faculty of Natural Sciences and Mathematics - University of Kragujevac 2020 - 2026
